The Foundation continues to support The Alfred

Margaret Pratt passed away peacefully at her home last year but her giving spirit continues to live through her Foundation and its generous support of The Alfred.

A former patient of The Alfred and the first person to undergo three double lung transplants, Margaret was passionate about improving the survival rates of lung transplant recipients. The Margaret Pratt Foundation was set up soon after her first double lung transplant and supports the Alfred's leading work in transplantation research.

Its support of the hospital continued last month when Margaret's husband and co-founder of the Foundation, Tony Pratt, and the Foundation Committee Chairperson, Ann Cohn, presented a cheque for over \$110,000 for lung transplant research at The Alfred.

This wonderful donation will help continue to fund many research projects taking place in Allergy, Immunology and Respiratory Medicine. "An active research program has been developed in collaboration with the clinical service at The Alfred, which is focused on extending the life expectancy and improving quality of life for transplant recipients. The Margaret Pratt Foundation is proud to support these research programs", Ann Cohn said.

The Alfred would like to thank the Margaret Pratt Foundation for their generosity and ongoing support of our work.
